# Alex Pooley Technical Lead

## About

I have helped deliver world-class technical projects to millions of users over a decade of experience in the technology industry. I thrive in challenging and high-speed environments and am always committed to providing quality work. My background in engineering highly scalable and redundant systems powers my ability to lead efficient cross-domain development teams, even remotely.

## Career

### Director of Engineering

**Unnamed Group**
Non-Profit Community Builders

December 2022 - Present
Full-Time
Harwich, United Kingdom

Node.js | React | Docker | Next.js | Tailwind CSS | MongoDB

I'm responsible for the technical direction of the community, including the website, Discord server, and other community platforms. I also manage a team of developers, designers, and moderators.

**Achievements**

- Built a community of over 1000 members.
- Launched a successful Discord server.
- Raised over $1000 for charity.
- Monetized the community through Patreon.

### Solutions Architect

**November Games**
Game Studio (MMO + SDKs)

February 2022 - December 2022
Contract
New Zealand (Remote)

Node.js | Unity | C# | Go | AWS | DynamoDB

I was responsible for designing and implementing the backend architecture for a new MMO game. I also developed SDKs for Unity and Unreal Engine to allow other developers to integrate with our platform.

**Achievements**

- Designed and deployed a globally-distributed game server and API.
- Implemented a ticket-based party system with sub-second matchmaking.
- Acted as domain expert during meetings with AWS, Twitch, and NVIDIA.

- Enabled the delivery of a complex project with a tight deadline.

### Technical Lead

**CORE Data Systems**
Educational Games Platform

March 2018 - February 2022
Full-Time
Colchester, United Kingdom

PHP | Symfony | Node.js | React | MySQL | GCP | Kubernetes

I was responsible for the technical direction of the company, including the development of the "CoreSciences" platform. I managed a team of developers, designers, and QA testers.

#### Achievements

- Built a platform with over 100,000 users.
- Launched a successful educational games platform.
- Monetized the platform through subscriptions.
- Managed a team of 10+ developers.

### Full Stack Developer

**Aspen Woolf**
Real Estate Investment Firm

April 2017 - March 2018
Freelance
Manchester, United Kingdom

PHP | WordPress | Apache | NGINX | MySQL | DigitalOcean

Working through a white-label agency called BayCat, I was responsible for developing and maintaining the company's high-traffic WordPress website. I also developed custom plugins and themes.

#### Achievements

- Developed and maintained a custom WordPress theme.
- Implemented a custom property search engine.
- Optimized the website for SEO and performance.
- Managed a team of 2 developers and 1 designer.

### Backend Engineer

**World Registration Systems**
Event Registration Platform

November 2016 - April 2017
Full-Time
London, United Kingdom

HTML5 | CSS3 | JavaScript | PHP | Apache | Linux

I was responsible for developing and maintaining the company's event registration platform. I also developed custom APIs and integrations with third-party services such as WorldPay.

#### Achievements

- Developed a custom event registration platform.
- Integrated with WorldPay for payments.
- Optimized the platform for SEO and performance.
- Managed a team of 2 developers.

### Backend Engineer

**Peccy Networks**
Web Development Agency

July 2014 - November 2016
Full-Time
London, United Kingdom

HTML5 CSS3 JavaScript PHP Apache MySQL

I was responsible for developing and maintaining the company's client websites. I also developed custom plugins and themes for WordPress, Joomla, and Magento.

**Achievements**

- Developed custom themes and plugins for CMS platforms.
- Optimized websites for SEO and performance.
- Managed a team of 3 developers and 1 designer.
- Implemented a custom ticketing system for client support.

# Projects

**World Anvil**
Worldbuilding Platform

December 2017 - February 2023
Professional

World Anvil is a worldbuilding platform that enables writers, gamers, and creators to build and share their fictional worlds.

I was responsible for the high-availability and scalability of the platform, including the development of DevOps pipelines and monitoring systems alongside general networking and security.

# Certifications

**Responsive Web Design**
from freeCodeCamp

**JavaScript Algorithms and Data Structures**
from freeCodeCamp

**Python for Data Science**
from freeCodeCamp

**Data Visualization**
from freeCodeCamp
