Alex Pooley Technical Lead

I have helped deliver world-class technical projects to millions of users over a decade of experience in the technology industry. I thrive in challenging and high-speed environments and am always committed to providing quality work. My background in engineering highly scalable and redundant systems powers my ability to lead efficient cross-domain development teams, even remotely.

Director of Engineering @ Unnamed Group, Non-Profit Community Builders

📅 **December 2022 - Present (Full-Time)**

Key Skills ✅

- Node.js
- Python
- GCP
- Cloudflare
- CI/CD
- Docker
- WebSockets
- Linux

Achievements ✨

- Spearheaded founding policies and standard operating procedures to ensure high productivity.
- Planned and deployed a multi-tenant communication platform then fostered an efficient inter-departmental environment between technical and business operators.
- Developed multiple projects that further increased efficiency and community engagement such as ChatOps automation and a person-centric “getting started” guide.
- Implemented highly redundant system plans to ensure sustained company operation.
- Led teams that successfully met community and company standards three times back to back.
- Migrated all on-premises data and compute needs to a scalable hybrid cloud network.

Solutions Architect @ November Games, Game Studio (MMO + SDKs)

📅 **February 2022 - December 2022 (Contract)**

Key Skills ✅

- Node.js
- C#
- Golang
- Unity
- AWS
- Lambda
- GameLift
- DynamoDB
- Cloudflare
- CI/CD
- Docker

Achievements ✨

- Designed, deployed and maintained a globally scalable game server and API infrastructure to support the first-ever play-to-partner game in partnership with Twitch.
- Successfully implemented a ticket-based partying system and efficient sub-second matchmaking handler to improve the user experience.
- Designed and deployed a dynamically scalable API platform as a service with OAuth2 authentication, ensuring secure and reliable data transmission.
- Optimized for minimal player latency by deploying globally available game servers.
- Contributed to technical discussions with critical business partners, such as AWS, Twitch, and NVIDIA, to ensure the smooth execution of project goals.
- Enabled the successful delivery of a complex project with a tight timeline, delivering an unparalleled user experience for the gaming community.

Technical Lead @ CORE Data Systems, Consultancy

📅 **March 2018 - February 2022 (Full-Time)**

Key Skills ✅

- Node.js
- React
- PHP
- Symfony
- MySQL
- MongoDB
- GCP
- App Engine
- Datastore
- Cloudflare

Achievements ✨

- Led the implementation of modern technologies, including continuous integration pipelines, Kubernetes deployment manifests, app health checks, and complicated cluster charts, resulting in improved application uptime.
- Managed a team of ~15 developers and liaised between the business and technical departments.
- Ensured high productivity while minimising technical debt by implementing efficient team organisation strategies.
- Collaborated with public officials in the education sector to satisfy strict user requirements.
- Successfully orchestrated a team of both remote and office-based developers during the pandemic.
